Mission

To work in collaboration with stakeholders to design and implement innovative programs that will contribute to better teaching and learning environment and a healthier community.

Vision

Every child in the community has access to better education, health, clean water and sanitation.

Our Objectives

01

Empowering teachers, Pupils and improve school infrastructure

02

Promoting Health and Wellbeing

03

Environmental Sustainability

Target Groups

01

Children

Children are the foundation of our future, and their well-being directly impacts the prosperity of communities. By investing in their education, health, and overall development, we create opportunities for them to thrive and contribute meaningfully to society.

02

Young People

Young people hold the potential to drive innovation and change. Empowering them with skills, knowledge, and self-confidence ensures they can overcome challenges, become self-reliant, and shape a brighter future for themselves and their communities.

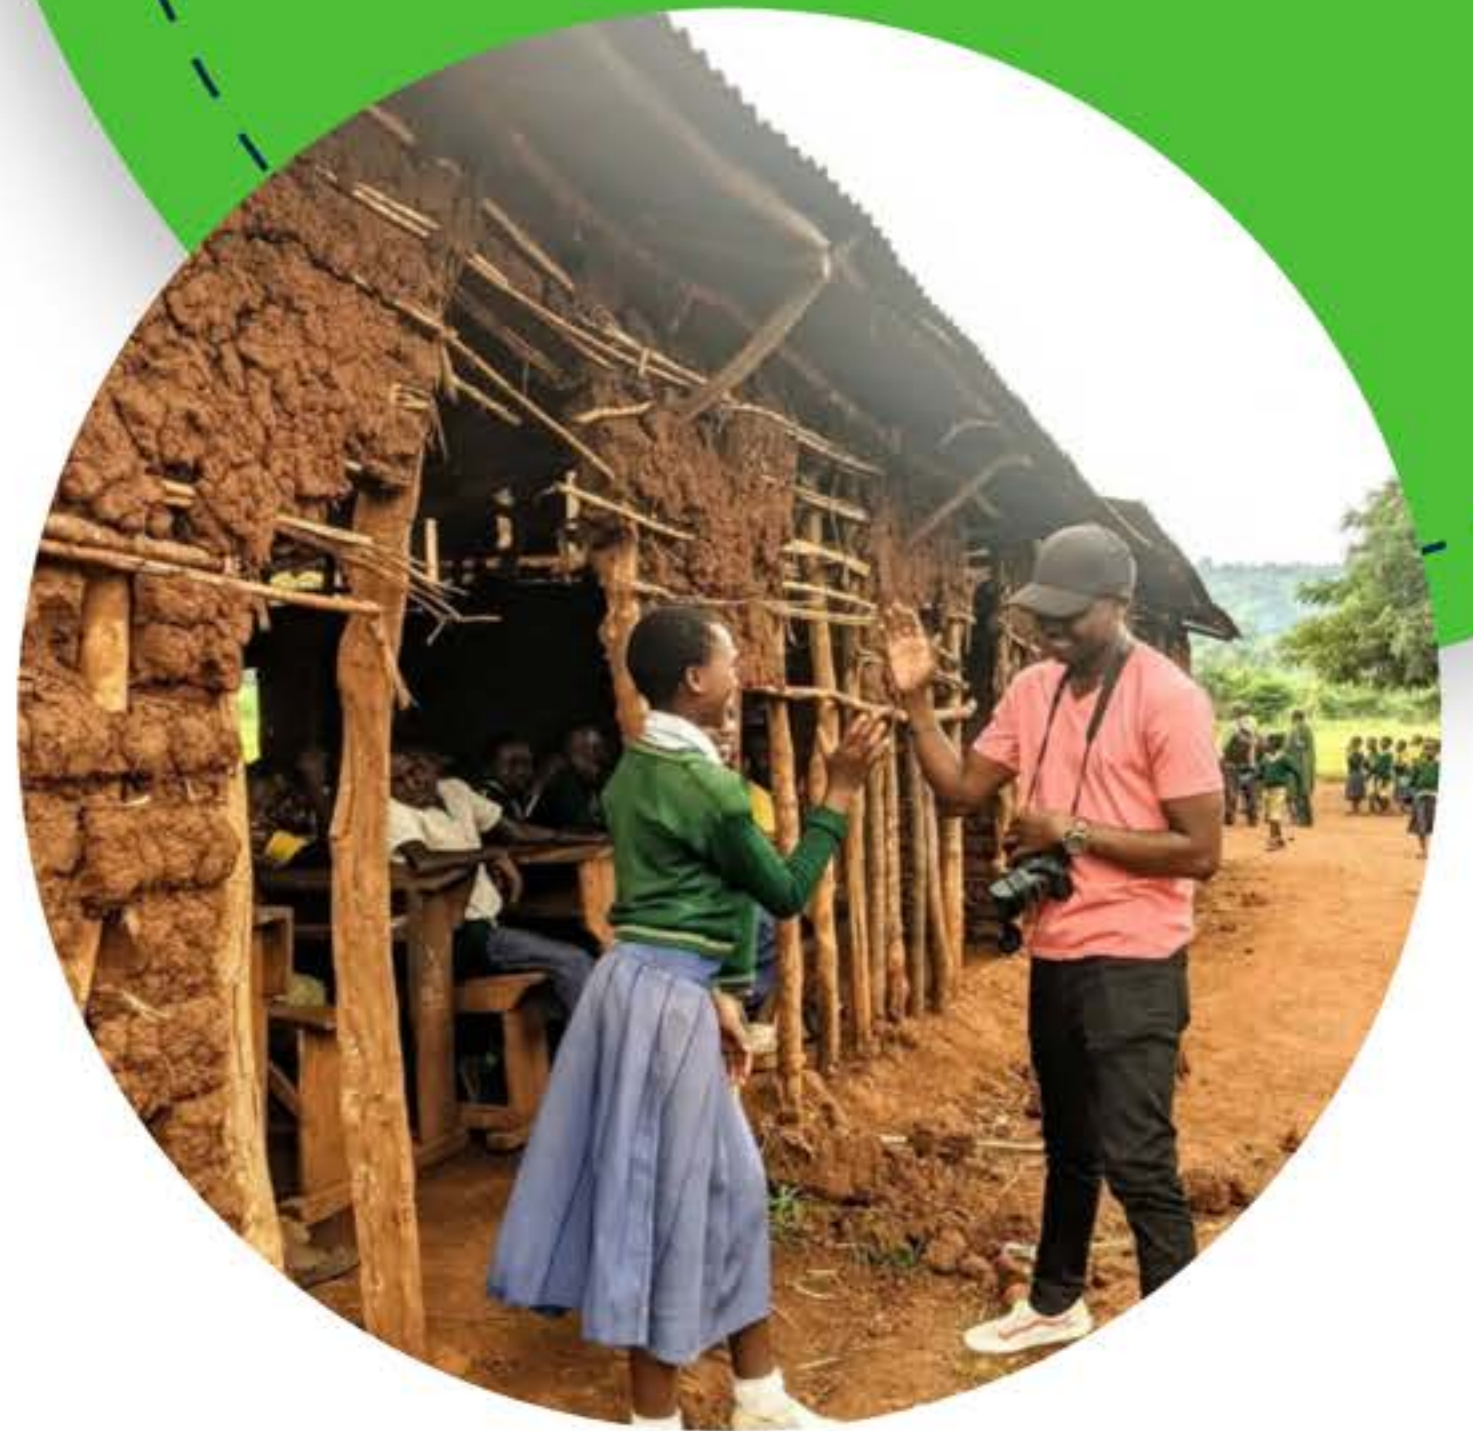

03

Women

Women are the backbone of families and communities, often playing a pivotal role in nurturing and education. By supporting women, especially in areas like health, economic empowerment, and leadership, we create ripple effects that enhance the well-being of entire households and accelerate community development.

Our Project

Kinda Education Support (KESU) empowers communities through transformative projects that improve education, health, and livelihoods. We train teachers on WASH and life skills, construct classrooms, toilets, and water tanks, and promote menstrual hygiene and reproductive health for girls. Our School Pesa Club builds financial literacy and self-confidence among adolescents, while we also support children, young people, and young mothers living with HIV. By integrating environmental conservation through tree planting, KESU ensures sustainable, healthier, and brighter futures for all.
